

It is my understanding that the FCC is considering a change that would allow K-Love to be displaced by an LPFM broadcaster providing other programming. I can attest to the number of listeners in the Memphis metro area that currently tune in to K-Love not only by discussions I have had with others but the surprising large number of bumper stickers I see every day. It would clearly be a disservice to our community if K-Love were no longer accessible over the free broadcast stations in our area. Please do not allow the Low Power FM stations displace the current FM translator service stations that brings K-Love to thousands in the Memphis area and hundreds of thousands across the US.

Sincerely,

Robert Longfield
